

Freedom Grads ---> Future Stars

Kayleigh Roberts is a 2015 graduate of Freedom Area High School where she competed on the Cross Country and Track teams, was President of the Photography Club, member of the Spanish Club and Math League. She was also a member of the National Honor Society and graduated in the top 5 of her class with high honors. Kayleigh received multiple scholarships when she graduated from Freedom to pursue her college education.

Kayleigh graduated Magna cum laude in 2018 from Robert Morris University with a B.S. in Biology and minor in Chemistry. While at RMU, she was awarded the RMU Presidential Scholarship and was named to the Dean's list multiple times. Kayleigh was a member of the Tri-Beta Biological Honors Society, PA Wildlife Society, and National Society of Collegiate Scholars.

In March 2020, Kayleigh received her BOEM NTL 2016-G02 Protected Species Observer certification in Clearwater, Florida and started her career at Microbac Laboratories, Inc. as an Environmental Lab Analyst. She works with different lab instrumentation to analyze various water, wastewater, drinking water, soil and sludge samples and report the data back to the customer.

Kayleigh greatly appreciates the few teachers that helped her excel in class over the years to better prepare her for college as well as the close-knit honors students that pushed her to be the best student she could be. While Freedom is a very small-town school that may be known for seniors driving their tractors to school the last day, there are teachers who are extremely passionate about their teaching, are always willing to help students that need it, and will push students to pursue their dream careers. This is a rare quality to find in teachers and is often taken for granted when parents are considering schools for their children.
